

# CONTRACT LIBRARY WEB SYSTEMS ENGINEER

Wilmington, MA

## WEEK OF OCTOBER 15 – DECEMBER 5, 2018

The Technical & Marketing Information Services (TMIS) group provides Analog Devices' worldwide locations with online access to research and information resources in a fully digital environment. We are seeking a contractor to participate in the support of TMIS systems and services across a wide range of technologies and platforms.

The person who fills this contracted position will be focused on main projects that require:

- Administrative knowledge of JIRA Service Desk
- Knowledge of SharePoint and SharePoint Designer 2013 at a level of expertise that allows for enhancement, troubleshooting and maintenance.
- Processing data loads using: MarcEdit, OpenRefine, FileZilla and Excel
- Knowledge of PHP framework based forum applications, exemplified: Simple Machines Forum and MySQL databases

Other areas of responsibility include:

- Ability to troubleshoot and collaborate with remote users
- Custom web development to enhance existing functionality and content on the TMIS web site (CMSMS)
- System Administration on TMIS servers and related software as needed (Linux, RHEL 6)
- Updating, customizing, and maintaining usage statistics & analytics tools (currently Matomo)
- Creating and updating documentation of these systems as needed (OneNote, Confluence)
- Acting as the primary liaison with the IT department and other systems stakeholders across ADI

Qualifications:

- BSCS (or related degree) with 3-5 years progressive experience in web and system design and support or equivalent education and experience is required
- Experience with both Linux and Windows environments is required
- Web design, scripting skills, and software knowledge are essential, including HTML, XML, CSS, PHP, JavaScript, and other languages as needed.
- Experience with OpenRefine, MARCEdit and FTP software required
- Excellent oral and written English-language communication skills are required
- Experience setting up library applications such as link resolvers, electronic resource management systems, and discovery services is strongly desired
- Experience with SharePoint APIs and SharePoint Designer is desired
- Experience with Atlassian tools (JIRA core, Confluence and JIRA Service Desk is desired)
- Experience with MySQL Database desired

Interested candidates should send a resume and brief statement of their interest, qualifications, and availability to [tmis@analog.com](mailto:tmis@analog.com).

Applications are also accepted through the [SLA Career Center](#).
